Solar Flare

Synopsis

Without the sun's powerful gravity, our earth would fly into space. The sun keeps us from freezing to death, allows food to grow and gives us energy to fuel everything from calculators to cars. Yet this faithful lifeline also has the power to wipe us

Customer Reviews

I read this book in the 1990's and thought it had a lot of truth in it. I have wanted to purchase it since. And now enjoyed rereading it. Thank you

Good book well written.

Interesting to think how we as a society would handle life with no electronic gadgets

Mr. Burkett has done it again, with a book that seems prophetic, considering it was written so long ago, and could still be applicable for our world, today. Loved the book.

I like the premise of this book. A professor predicts a major solar flare that will effectively neutralize all electronics on earth and the political and societal collapse that comes with it. If you're familiar with *One Second After* or *Lights Out*, you get the premise. Unfortunately, the author's story telling is too straight forward. Very predictable. So many details are left out that it

makes you wonder what level of research or thoughtfulness was really done. The premise is believable, but it's just sooooo predictable and simple. After the solar pulse for example that fries electronics why is there no mention of older mechanical vehicles that have no electronic ignition or components? It goes from modern 2011 era cars instantly to horse drawn wagons. Every major city basically evacuated, within 3 days? Come on... Too organized, too perfect. To make matters worse, 1/2 to 2/3 of the book the author turns his attention and the messaging turns hyper religious as Burkett injects his own values apparently and proceeds to inject bible verses and prayer as the virtue of every character, and how this was the primary reason law & order is maintained. Please... I bought this book @ the Grocery store actually and probably should have looked here as I see now it's a Christian Mystery or similar print item. Whichever. I was looking for a thoughtful storyline, but sadly, despite a couple of decent (but sloooow to develop) buildups, this clearly isn't it. Read One Second After, Lights Out, or Rawles book on Patriots - Patriots: Surviving the Coming Collapse - instead (economic collapse storyline) for a much more researched and thoughtful tale.

ordered cassettes, CD's not available. More of a shortened dramatization.
