Megalodon: Fact Or Fiction? (Creature Scene Investigation)

Synopsis

People swimming and surfing along warm oceanfront beaches can rest easy because the Megalodon, the gigantic cousin of the great white shark is extinct--or is it? Follow the fossil trail as scientists are able to determine what this monstrous shark looked like, what it ate, and even how it hunted its prey the gigantic cousin of the great white shark from as little evidence as a single hand-sized fossil tooth. In *Megalodon: Fact or Fiction?*, readers will be swept along with this investigative journey as cryptozoologists try to determine whether this terror of the deep still lingers in the hidden depths of the ocean.

Customer Reviews

I paid 18 bucks for this? It's nothing like I expected. I have not finished it, but feel for that price I should have had the shark come out to greet me.
