# The Amazing Story Of Kuton The Photon

## Synopsis

Kuton is a sweet little photon that arrives at Sage Paramacharya's Ashram in a bewildered state and seeks the Sage's help. Using his divine vision, the Sage discovers and narrates to Kuton all the adventures faced by Kuton's ancestors, starting from their birth in the core of the Sun, surviving all the Monsters lurking inside the Sun. and finally escaping from Sun by riding on the Eddies driven by the Prophet Convection. During their escape, the Photons encounter the snake-like Magnetic Flux Ropes and listen to the strange Song of Sun sung by the Eddies. They pass through the Photosphere, Chromosphere and Corona and reach the top of the Earth's atmosphere after whizzing through the Interplanetary Medium. They are confronted by the policeman Thermosphere who quarantines the harmful Ultra-Violet and X-ray Photons in the house of Ionosphere, his brother officer. The Radio Photons choose to stay with Ionosphere, while the Infrared Photons meet some moist air and choose to stay back to play with the water of the moist air. The Visible light Photons like Kuton, finally arrive at the surface of the Earth. What happens next to Kuton is left as a surprise to the reader. This story is a dramatization of the actual fate of the energy produced in the centre of the Sun, as it travels through photon-absorbing matter and finally reaches our Earth. The child reader gets to know about different physical concepts of nuclear fusion reactions, nuclear strong and weak forces, electromagnetic and gravitational forces. The production of magnetic fields in the Sun, the heating of the solar chromosphere and corona, the nature of sunspots, the eruption solar flares and the creation of the solar wind are all touched upon, so that the children get to know about the processes happening in the Sun in a "painless" and entertaining manner. This book is a very good gift for a child who is curious about things in the Universe into which it is born.
