Principles Of Plant Genetics And Breeding

Synopsis

To respond to the increasing need to feed the world's population as well as an ever greater demand for a balanced and healthy diet there is a continuing need to produce improved new cultivars or varieties of plants, particularly crop plants. The strategies used to produce these are increasingly based on our knowledge of relevant science, particularly genetics, but involves a multidisciplinary understanding that optimizes the approaches taken. Principles of Plant Genetics and Breeding, 2nd Edition introduces both classical and molecular tools for plant breeding. Topics such as biotechnology in plant breeding, intellectual property, risks, emerging concepts (decentralized breeding, organic breeding), and more are addressed in the new, updated edition of this text. Industry highlight boxes are included throughout the text to contextualize the information given through the professional experiences of plant breeders. The final chapters provide a useful reference on breeding the largest and most common crops. Up-to-date edition of this bestselling book incorporating the most recent technologies in the field Combines both theory and practice in modern plant breeding Updated industry highlights help to illustrate the concepts outlined in the text Self assessment questions at the end of each chapter aid student learning Accompanying website with artwork from the book available to instructors

I like the effort put into this book. The cursory survey of some major crops should be improved or deleted. The book is easy to read and well illustrated for the price.

Very informative book. Shipped nicely.

Very good book.

Covers a number of subjects on plant breeding; includes a lot of math (calculus). A good current book on the subject.

nice book

The book was in a good shape with the good cover as the way i like it, and the shipping was on time, I highly recommend this book

Very good book. The book came in very good water tight packaging. Bought new, was new.

Exactly as the description said!
