Rapid Response Billing						
When a hospital requires a 1:1 service shared between a physician and an NPP from the same group practice and the physician provides any face-to-face portion of the 1:1 service with the patient, the service may be reported as a physician service. If the physician and NPP provide a 1:1 service face-to-face together between the patient and the physician, the service may only be billed under the NPP when possible. This guideline is not applicable to critical care, air splint/transport billing, or flight.						
*The visit is determined by increasing or coordinating care. An encounter face-to-face time is determined as an office time component and that more than 50% of total time was determined by increasing or coordinating care (less than 50% of day of day component).						
*No time is assigned to observation care charge.						

Synopsis

This handy card lets you quickly find the right pediatric Evaluation and Management (E/M) code for each level of inpatient or outpatient service. For both established and new patients, documentation guidelines are provided by way of typical times, medical decision-making, history, and examination. This 8" x 11" card is fully updated for 2017 and laminated for extra durability.
