## Customer Reviews

Edible Cities aims to inspire urban residents to incorporate nature, preferably the edible variety, into their lives. The authors, ardent permaculturists inspired by their study with Sepp Holzer (who also wrote the foreword to the book) believe that growing plants is possible for anyone with a balcony, rooftop, or even just a windowsill. To that end, they offer a broad overview of permaculture followed by numerous examples of how it is implemented in ways both beautiful and delicious. Joan Bailey, food and farm blogger in Japan

Judith Anger is a freelance events promoter in Vienna. In 2011, she started the PermaVitae organization to develop permaculture training. Dr. Immo Fiebrig is a qualified pharmacist, scholar, and professional communicator in permaculture and health. Martin Schnyder is a trained landscape gardener and has been working as a self-employed gardener in central Switzerland since 1997.

Absolutely a must have with outstanding resources and benefits of urban gardening for smaller spaces!

Such wonderful ideas, examples and thoughts. As a "foodscapist" I found lots of inspiration, and some ideas, inside. This is a book for everyone! Everyone will get something out of it - and maybe even plant some food because of it.

Very interesting read! This is my passion here on our homestead so I love to see what others are doing.

Really interesting little book full of ideas for small-space permaculture gardening.

Gives me hope. Lots of interesting ideas.

Great
