Wetland Plants Of Oregon And Washington

Synopsis

This concise and easy-to-use field guide provides a wealth of information packed into 240 pages. Grouped by habitat, the color-coded sections describe the wooded wetland, wetland prairie, marshy shore-land, and submerged and floating communities. Included are more than 330 species, with intriguing notes on endangered plants, wildlife uses, associated species, and natural history. Includes over 300 exceptional color photographs, 74 line drawings that provide further detail, and hints for distinguishing easily confused species. Includes appendices describing whether species are endemic, native, introduced, marginal, or transitional. With glossary and index to both common and botanical names.

Customer Reviews

This is a beautifully illustrated, easy-to-use field guide. Whether you are a naturalist, a day hiker, or an armchair adventurer, this reference book will be a welcome addition to your backpack or library. --Hortus Northwest"Striking photographs of some of the most difficult-to-photograph plants there are!!! Image after image offered informative and beautiful portraits of many of our Northwest wetland plants. Trygve Steen provided the photographs and rightly deserves high praise for the technical perfection and beauty achieved in most of his 300+ photos. The book's convenient size and superb photography make it a valuable field reference." --Douglasia magazineA fine overview of wetland plant species and associated habitats. This field guide provides an excellent, user-friendly introduction to the wetland plants and habitats of the Pacific Northwest. . . The author's description

and graphic display of the more common species of Washington and Oregon makes this book a very useful field reference. Aquatic Botany magazine

Jennifer Guard is the founder of Wetland Specialties, an Oregon-based environmental consulting business that offers botanical, wetland and land planning services to municipal, industrial and private organizations throughout the Pacific Northwest. Jennifer is a natural resource specialist and a botanist who understands the need to regulate growth and development with careful natural resource planning. As a biologist, photographer, and educator, Professor Steen shares the extraordinary beauty and diverse ecology of the Pacific Northwest. His photographs have been published by the Sierra Club, the Audubon Society, and the National Geographic Society, and exhibited in museums throughout the United States.

Excellent book! It is helping me learn about the wetlands.

Very informative.
