Customer Reviews

I really liked the colorful book cover on Deborah's latest book *Acupuncture Points*. Also, I am so pleased that she has chosen a nice large font. It makes it so easy to read. The graphics are absolutely amazing. They are so clear and easy to understand. Obviously, it must require a great deal of research and training to write a book of this type. She must have spent many months completing it. I gave this book a 5 star rating. This is the 4th book I have purchased by this author. Her books have been so helpful. I am very interested in learning how to have good health without the use of prescription drugs. Her books always give good suggestions about how accomplishing this. Keep up the good work and write another book soon.

I think this is a good reference for patients to have a hold of when they are already familiar with acupuncture. It is set up according to the meridians and covers every point, which could be overwhelming for a newcomer. I believe there is a market for a shorter version of this book as an

introduction - the 25 most used points for acupressure or something like that would be a great reference for people getting started. That being said, it is well thought out, well illustrated and obvious that a lot of heart and soul was poured into it.

Wonderful book for everyone ... great illustrations and clearly written explanations ... As an acupuncturist, I am so excited to have this book in my waiting room for my patients to read!!!

i bought this book and was very pleased. this book explained to me how acupuncture works and how the treatments help the patient feel better. i have been having acupuncture for a while and am very glad i purchased this book i really liked learning more about the treatments. thank you for writing this book.

I enjoy this book for my patients.

Well organized reference book. Easy to find points for acupuncture symptom relief.

I knew nothing about acupuncture and now I do. Good read and easy to understand.

Wow, very nice job. As an acupuncturist I have been wanting a book I could refer patients to who would like to understand acupuncture better. This is by far the best I have seen. Talks about how acupuncture is really done and how it really works rather than just repeating the same old tired stuff someone got off the internet. Original and genuine.
