Cancer And Nutrition: A Ten Point Plan For Prevention And Cancer Life Extension

Synopsis

Two of every five Americans will develop cancer. Most adult cancer patients today live no longer than those who had it in 1920. Treatments produce the same length of life, but when you modify your lifestyle, you may live longer. Dr. Simone reviews how good health can be yours. Since genetics cause only 7% of cancers, you have control. Dr. Simone, a world renowned cancer specialist, is brave enough to share with you the truth about BPH and prostate cancer without emotion or influence from the medical establishment, pharmaceutical industry, national organizations, special interest groups or government agencies. Be your own advocate. Don't leave it to others. You can virtually control the destiny of your health. By following his easy Ten Point Plan, you can reduce the risk for cancer, or, if you have cancer, you can help extend your life. The choice is yours.

Charles B. Simone, M.D. is an Internist (Cleveland Clinic), Medical Oncologist (National Cancer Institute), Tumor Immunologist, and Radiation Oncologist (University of Pennsylvania). He discovered how white cells and complement proteins kill, collaborates in proteomic research, wrote the landmark book, *Cancer and Nutrition* (1981), helped organize the Office of Alternative Medicine, NIH (1992) and received FDA approval to study shark cartilage. He helped write the Dietary Supplement Health Education Act of 1994 that ensures all Americans have access to truthful health information. He helped win landmark cases against the FDA [Pearson v Shalala] by showing they violated the First and Fifth Amendment rights of Americans. He appears on 60 Minutes, Fox News

Channel, Prime Time Live, and many others. For his patriotism and science, he was bestowed the first Bulwark of Liberty Award and the James Lind Scientific Achievement Award.

This book just like the actual doctor is outdated and useless.
