Cystic Fibrosis (Facts)

Synopsis

Cystic Fibrosis: The Facts provides a much needed simple and understandable source book about this disease. It is aimed at those living with Cystic Fibrosis (CF), either themselves or members of their families or their friends. The book explains clearly what is happening to the body in CF, what causes it and what treatment options are available for the different aspects of the disease. There are more detailed chapters for those wanting to find out about the genetics of the disease and specific aspects such as how it affects life choices and employment. It looks to the future in terms of potential new therapies for CF and provides useful information on organizations that can provide help and further information across those areas of the world where the disease is prevalent.

Ann Harris is Director of the Human Molecular Genetics Programme at the Children's Memorial Research Centre in Chicago, USA. Anne Thomson is Director of the Oxford Paediatric Cystic Fibrosis Centre at Oxford Children's Hospital in Oxford, UK.

My daughter has CF. I was looking for a good refresher on the basics to keep up with everything. This book is written partially in European Slang. It is slightly difficult to understand. Overall, not impressed with the purchase.

recommend it to my friend. just fine, As a professional chef i need and use top quality knives. I have a number of well known brands and most are high quality. This product, however, particularly because of the price, is as good or better than most all of them. I am buying now just to have at this price. Don't wait get it, or get two. in my family it is necessary, very kind and the best seller.

it helped me write a paper for cystic fibrosis for school
