Aliens: The World's Leading Scientists On The Search For Extraterrestrial Life

Synopsis

In these lively and fascinating essays, scientists from around the world weigh in on the latest advances in the search for intelligent life in the universe and discuss just what that might look like. Since 2000, science has seen a surge in data and interest on several fronts related to ET (extraterrestrials); AI (artificial intelligence); and SETI (search for extraterrestrial intelligence). The debate has intensified over whether life exists outside our solar system, what that life would look like, and whether we'll ever make contact. Included in this audiobook are essays from a broad spectrum of the scientific community: cosmologists, astrophysicists, NASA planetary scientists, and geneticists, to name just a few, discussing the latest research and theories relating to alien life. Some of the topics include: If life exists somewhere in space, what are the odds that it evolves into something we would recognize as intelligent? What will space travel look like in the future, and will it all be done by cyborg technology? How long until we are ruled by robot overlords? (This is actually a serious consideration.) Are we simply a simulation in the mind of some supreme being acting out a virtual reality game? For those who have ever wondered, Is there anybody out there? here are the latest theories and evidence that move us closer to answering that question.

Customer Reviews

I learned a lot and found it easy to read. The only part not worth reading is the chapter on aliens in the media / movies. Well worth the money.

very eye opening, intelligently compiled.

Writing- excellent! Content - superb!

Interesting short stories with scientific background on aliens ...

Exactly what I expected. Very informative. Enjoyed it tremendously.

This book is interesting and informative, some of the essays are better than others, but in general it's a nice read.

Diferent kind of scientist opinions. Meny diferents views.

Excellent overview of scientific opinion on the probability of life throughout our universe. I thoroughly enjoyed the audio version.
