"This book is the most comprehensive book to date to help teachers and community health educators understand the 'how' and 'why' of effective HIV/AIDS prevention and sexuality education." -SIECUS (Sexuality Information and Education Council of the US)

Evonne Hedgepeth, Ph.D. is Executive Director of Lifespan Education in Olympia, Washington and has served as adjunct faculty at four colleges. Both have worked as public school teachers, community health educators, teacher-trainers and consultants in sexuality education.

This book is written in an easy font to read. Reading goes quick and it is interesting. I wish all books were like this so I wouldn't have to strain my eyes.

Awesome book...very detailed and to the point. Great book to have if you're planning on teaching students or anyone about sexuality. It talks about the do's and don'ts in sexuality education and different approaches one can use to carry out an effective discussion about sexuality.

I wish I could provide this book to everyone who teaches about sexuality and HIV, as well as those who make policy, funding, administrative, and other decisions about sexuality and/or HIV education. This is the single best resource on this topic in existence for new educators and veterans. It's all here: theoretical foundations for educational programs; descriptions, definitions and samples of a wide range of teaching/training methods (enough lectures, already!); how-to-choose which methods, when, why, and for whom; and a historical and current context for sexuality education. This comprehensive content is presented in a variety of ways, including real stories, some funny, some sad, all well-chosen to illustrate and enrich the valuable teachings. If you're only going to buy one resource on sexuality/HIV education, make it this one.
