Customer Reviews

Moon Handbooks exude a road-wise, close-to-the-ground authority.

Well written book. Very specific about what's going on in Honduras. Traveled to Honduras using this book as reference. Visited the Mayan ruins, thermal waters, waterfalls and Roatan for some snorkeling and scuba diving.. Had a great time

The order met my expectations.

Whenever you ask for directions in Honduras, this is what you'll be told: "alli no mas", just a little further down the road. Take this book with you instead. Christopher Humphrey's handbook gives you the "why", along with the "where" and the "how much". Conscientious travelers know that there's more to a place than cheap, clean hotels, or cheap, reliable restaurants. Traveling involves knowing what makes a place special, what to look for which is unique and different, and what is it about a

place that guarantees it a place in our memories. This book provides the answers. I lived and worked in Honduras for two years in the 70's, and I return often. This is the book I take with me. The contributors have an excellent understanding of Honduran history and culture, and this book is a very good resource for understanding a beautiful and little-known country. So, if you go to Honduras, ride the campo busses, drink a couple of Salva Vidas, enjoy a fine cigar or two, and don't miss eating that fabulous North Coast sopa de mariscos. And don't leave home without this guidebook. Que les vayan muy bien!

I'm not sure there even is another country-specific guidebook for Honduras, but if you're going to be there for even a few days this is the one to get! I've used a lot of different guidebook series in many parts of the world, and I can confidently say that the country-specific Moon Handbooks for Central America are far and away the best guidebooks I've ever used. They're extremely complete in every way--both in the practical and the historical--and they include "hidden gems" not mentioned in other guidebooks. That's because these guidebooks are written by people who've lived in the countries they're writing about, and clearly care about these countries. It really shows through in the quality of the books. You might want to read the reviews of the Moon Handbook for Nicaragua to get a sense of the quality of Moon's Honduras handbook--they're similar in many ways.

I'm not sure if the other reviewers have a different outlook on travel, but I found this book to be completely useless. The writer couches critiques without telling you explicitly where to go and where to avoid. I found the book extremely frustrating. For example, one seedy place that we had planned on staying was truly miserable - the book describes it as "your best option" in this part of Honduras... In my mind a guide should do just that - guide you to the good and help you avoid the bad. This book just fails to give you the straight facts.
