Innovative Nutrition Education Programs. She also was a Fellow of the United Nations, World Health Organization at the WHO Collaborating Center for Nutrition Education, University of Athens, Greece. She enjoys exploring food and culinary customs, traveling, diving, and gardening.

Good book, was able to pass class with no issue's, exactly what I needed. Nice to just rent book and not have to buy it. Rented for like \$15 where as college want \$300. Great savings and don't have just another book on shelf.

This is a pretty good textbook that we ordered new. The material seems good, but unlike other new textbooks my daughter needed for her courses, this one did not come with the access codes included. This makes this textbook very expensive when you have to pay an additional \$80 plus more to get the access codes for the course.

Nice study helps, charts, guides, quizzes, summaries and pictures. Its a well thought out textbook. I am learning nutrition and am basically self-taught using this.

It's was a great deal because it came with an acces code as well for only \$30-\$40 and when my school was charging \$80 alone for the code and \$120 alone for the text

This is a great book to have even as a personal guide to enhance healthy eating habits.

Very accurate and precise book with lots of info

Thank you sooo much really helped a lot in class !!!

Of course it couldve been a little cheaper but i recieved it right when i needed it and hve been pleased with it.
