Straying from the Flock; Travels in New Zealand made me feel as if I'd actually visited the country. Each time I put it down, I was surprised to find that I was not in New Zealand. This is not a guidebook; it is a description of a trip taken by a wealthy person. Mr. Elder's vacation included comfortable lodgings, sampling wines, renting fishing boats, and taking a helicopter trip to a volcano. (Mine would include backpacking, sleeping outdoors, visiting a couple of museums, and only one extravagance: swimming with dolphins.) Even though this book won't help me plan my trip, I found it worth reading because it conveyed the beauty of the country and friendliness of its inhabitants. I enjoyed the book, but I can understand why it received some negative reviews. Several times, the author puts in writing comments about people that most of us would only whisper-- if we said them at all. The very first chapter starts with several unkind observations. Fortunately for readers, he admires nearly all of the people he meets and he loves New Zealand. (Perhaps his "honesty" put me inside his head, and that is the reason I felt as if I was sharing his trip through New Zealand.) It is nice when Mr. Elder mocks his own foibles. One of them is his obsession with the lack of guard rails at the sides of New Zealand roads; he mentions the topic so many times that it made me laugh, too. His comparison of Australia's and New Zealand's histories and cultures is intriguing, but almost certainly exaggerated and unfair to Australians. The kiss-and-tell in chapter 41 seemed out of place; I did not want to know about it and I'm sure the object of his affections would prefer that he hadn't shared their private evening, her real name, and the town she lives in. So why did I give the book four stars?~ He spoke with many different people and he must be a great conversationalist because he learned an amazing amount about New Zealand, including its culture, economy, history, politics, and agriculture.~ He is a very good writer. The fact that English is his second language only highlights that fact. His descriptions of scenery are vivid, whether he is in the mountains or on a beach, in someone's living room or on a boat.~ While many of his travel suggestions are extravagant (only fly business class?! \$\$\$), all of them strike me as good advice.~ His recollections

of his earlier trips to New Zealand with his children are very sweet.~ Finally, his love of New Zealand is palpable. The book was so engaging that I feel as if I have visited New Zealand. And I can't wait to visit again.

I bought this book because it was the first novel I have ever seen about New Zealand. Basically every other book has been a travel guide, some of which are useful, but none of which are a narrative of a person's experience in New Zealand. Alexander Elder is a frequent traveler to New Zealand and he relates his story of traveling from the south tip to the northernmost tip of the country over the course of eight weeks (with a few days in Fiji and Australia). He meets new people and visits old friends along the way. I really enjoyed this book, my only issues were that I couldn't completely relate to his way of traveling. He travels in a style where laying down several hundred dollars to get a guided trip a few times in a week is no issue. I tend to be on a much more restricted budget. He also has a bit of a different attitude than myself, more strict about superb service and attention than I probably would be, but it's his story not my own :) He does give a good impression of the hospitality that is present in most New Zealanders as well as the beauty of the land itself. I often felt like I was right along side of him during his trip. This is a good read for anyone interested in New Zealand, especially being a tourist there. He also provides a link to his website where he posted the photos (non-professional) that he took during the course of this trip, a nice little addition to enhance the story.

With a title like "Straying from the Flock" and a cover with an epic scenery and a hiker, I thought that this travelogue would be someone's off the beaten trail type travels. Instead, it was the dryly written travel diary of a rich American snob's boring travels. He writes of private ski lessons and expensive B&B's. He's extremely judgmental of all the people he meets and has expectations of people that I find to be quite pompous. He expects the people at the B&B to carry his luggage, make reservations for him and serve his every whim like a high end hotel, but also to feed him their best home cooked meals while entertaining him around their fire with intelligent conversations like they're old friends. He writes of moments when he's incredibly rude and opinionated to someone as if he's high and mighty and it was the best, most civilized thing to do. The only relevant piece of travel information that I received was that people in New Zealand are apparently really nice, because even when he's being a rude tourist they're quite friendly with him.
