Customer Reviews

Stephanie McCann, MA, is an independent medical and scientific illustrator with 30 years of experience. She received an MA in Medical and Biological Illustration from The Johns Hopkins University and a BA in Fine Arts from the University of California, Santa Cruz. She is an instructor at Santa Barbara City College, currently teaching digital drawing (Multimedia Arts and Technology Department) and previously teaching biological illustration (Biology Department). Joanne Tillotson, PhD, teaches undergraduate biology at Purchase College, State University of New York, where she has received the Pedagogy Award for innovative use of technology in the teaching

laboratory and the SUNY Chancellor's Award for Excellence in Teaching. Dr. Tillotson received her BS degree in Biology from the University of Dubuque and her PhD in Biochemistry from Michigan State University.

Very helpful and informative. Worth every penny. I wish I would have bought these before the semester but I'm so happy I have them now

The cards are a bit thin and can easily bend. But still like them and see very useful.

This is a good set of flashcards. For me personally I would have liked to see cell composition included since this was a large focus in my class. Overall though this is a very high quality set

My wife loves using them to study for A&P. Very detailed and sorted by body system.

Love it.

I used these cards to help me with an Anatomy class. They made a huge difference for my lab exams. Very helpful studying tool and works with any anatomy book

These are wonderful. The packing and organization of the cards is perfection. These are a life saver when studying, and I recommend them for anyone who takes A &P, or any other medical related class.

Loved them. I used them to start trying to memorize all the structures then used the anatomy coloring book to help drive it home. I've learned so much in the last week, it's amazing
